PROFESSIONAL SUMMARY

Full-stack developer building responsive, scalable web and mobile applications. B.S. IT graduate from Cavite State University. Collaborative, agile, and ready to build something great. Skilled in modern frameworks and cloud technologies, with a passion for creating magical user experiences.

WORK EXPERIENCE

Full Stack Web Developer | Festive Lighting Pros

Jun 2026 - Present

United States (Remote)

Develop and maintain web applications and internal business tools. Create responsive, user-friendly front-end interfaces using modern frameworks. Build and manage APIs, databases, and server-side functionality. Integrate third-party platforms, CRMs, and internal systems to improve operational efficiency. Test, debug, optimize, and secure applications for scalability and performance.

- Festive LMS — Internal learning and training web app with AI card generator, AI quiz generator, and AI voice training agent (VAPI)
- Festive Express — Sub-product (to-go version of Festive Lighting Pros); main contributor for CMS, orders, automation, and storefront
- Festive HR Portal — HR and recruiter automation tool with jobs, candidates, workflow automation, and dynamic templates

Full-Stack Developer | Highly Succeed Inc.

Apr 2025 - Apr 2026

Mandaluyong, Philippines (Remote)

Built responsive web applications by collaborating with designers to translate wireframes into functional websites. Focused on reusable components, performance optimization, and integrating UI with server-side logic.

- Converted React Portal Web App to Next.js 15 with TypeScript
- Developed and maintained Express.js backend APIs
- Projects: MBA LMS, Unleash PH Admin Portal, Plant AI Admin Panel, Night Pulse Dashboard, Makati Waste Management

Back End Developer | Nuclear Brain

May 2025 - Sep 2025

United States (Remote)

Node.js version upgrade for ExpressJS website with optimization for schemas and queries.

Frontend Developer | Zyllem

Dec 2023 - Dec 2024

Singapore (Remote)

Refactored Angular v7 to v18, implemented design patterns, and participated in code reviews. Created custom calendar views to reduce costs.

Junior Full-Stack Developer | Nuclear Brain

Dec 2022 - Dec 2023

Remote

Upgraded Angular v8 to v16, fixed TypeScript issues, integrated Unlayer API, deployed to AWS EC2 and S3, and implemented real-time progress with Socket.io.

Junior Mobile & Web Developer | Volli Bellingham

May 2022 - Dec 2022

Created mobile app UI, implemented customer-to-customer chat feature, and fixed bugs on web and mobile apps.
